

I am writing about K-LOVE radio. This station is a great benefit to me as a resident of my community and my community as a whole, providing a positive and encouraging message to listeners. Our world is so wracked with negativity and messages of violence and hedonism and materialism. It is a breath of fresh air to have a station to listen to good music with a positive, uplifting, family-friendly message. We need this type of influence in our society. I would hate to see anything change that.
